Extensions & Refurbishments

Pop-up shops and now pop-up chapels — Z+A Studio have designed a temporary cardboard arch for tying the knot. David Jamieson's Jamieson-like has taken a leaf-leaf structure of the Architectural Association in London and projects by Mooloo Lema, A & O Wojcik, Hawenham Mulligan & Associates, Philly O'Reilly Architects...

Extensions & Refurbishments

Waterloo Road, Dublin 4 designed by Newenham Mulligan & Associates

Waterloo Road, Dublin 4.

Brief: To provide much-needed family living space and to address the existing visual disconnection of house to garden and levels. The architects were asked to provide a new extension to the side and rear containing flexible, open, bright living spaces, additional bedroom, study and internal modifications to the existing house hall/atrium area. The concept was to create a linear extension which hides behind the existing granite stone wall and reconnects the house and garden with a reduction in site levels to the rear and side of the house. New urban courtyards were formed with the new extension and to address the previous planning history and integrity of the existing terrace and its curtilage, a concept was developed to float the extension behind the existing granite wall. A simple horizontal frame defines and houses the open living function with central cut-out semi-enclosed, open space. The central cut-out space between living space and bedroom allows the garden space to flow into the house and provides an important visual connection.

Architects: Newenham Mulligan & Associates
Structural Engineers: Barrett Mahony Consulting Engineers
Quantity Surveyors: Mulcahy McDonagh & Partners
Main Contractor: Willow Park Contracting Limited
Windows/Joinery: McNally Joinery
